Program Scope of American Indian Studies
The Department of American Indian Studies educational mission and objectives have a special responsibility to Native peoples of California and the United States. California is the land on which the University and department rest; CSU is a public institution in the United States education system. Therefore, significant aspects of the program and curriculum focus on Natives of California, U.S.-Native politics, and North American Indian cultures with the aim of preparing students to work with Native groups and urban communities in California and the United States. The program also includes an international comparative perspective and coalitional politics with Native peoples of U.S. occupied territories and more broadly within the Americas and the Pacific. It balances classroom education with an active community participatory learning component. Therefore, it best prepares students for going on to do graduate work or a number of different careers with Native peoples in not only California but internationally.

Community Service Learning
Many courses within the major provide a Community Service Learning (CSL) option, including AIS 205 and AIS 460. This option allows students to integrate classroom education with community participatory learning. Students are enrolled in an AIS core or elective course plus AIS 694 and work with an organization approved by the department for 15-45 hours over the course of the semester (depending on the units). AIS 694 is entirely online, with requirements that include short written assignments and a book review. Organizations with which students have served in the past include the American Indian Child Resource Center, California Indian Legal Services, The Cultural Conservancy, International Indian Treaty Council, and the Native American Health Center.

Career Outlook
An American Indian Studies major provides a diverse foundation of knowledge and skills that can be applied to a number of careers. American Indian Studies alumni have and can anticipate securing employment in agricultural and pastoral enterprises, environmental and cultural rights organizations, ethnography and cultural programs, health care and social work, media and communications industries, museums and cultural centers, teaching, tribal businesses and government, the traditional arts, and federal and state agencies like the Bureau of Indian Affairs, Environmental Protection Agency, Indian Health Services, National and State Park Services, Title IX Indian Education Program, the U.S. Department of Justice Civil Rights Division, and the U.S. Department of Labor.
