Chair: Dr. Russell M. Jeung

Program Scope
The goals of the Asian American Studies Department are to:

• Provide a comprehensive offering of courses about the histories, cultures, communities, and experiences of Asian Americans.
• Offer an interdisciplinary approach to Asian American perspectives, issues, and needs.
• Increase the general body of information within the field of Asian American Studies.
• Promote the application of skills and knowledge from Asian American Studies to the improvement of conditions within Asian American communities and the larger society.

Through its combination of course offerings, guided research, supervised fieldwork and participation, and student/faculty involvement in Asian American community activities and issues, Asian American Studies is the national leader of its field. The department, its faculty, and its students reflect the dynamic character of Asian American life and circumstances. Coursework in the discipline will be of value to any student intending a career that involves significant contact with Asian Americans, and to those who want to develop 21st-century work skills of critical thinking, communication, and cultural competency.

Undergraduate Program
The department offers a B.A. in Asian American Studies for students who wish to pursue a comprehensive program of study on Asian American experiences. The major provides students with a broad range of knowledge of the diverse Asian American population through disciplinary and interdisciplinary inquiries and analyses of Asian American history, literature, arts, and communities. Under advisement, students may use two specific courses to fulfill the history and government requirements and may use an unlimited number of units in Asian American Studies courses to count towards General Education. Students majoring in Asian American Studies are encouraged to study a modern Asian language or related courses.

Minor Program
The department offers a Minor in Asian American Studies for those who wish to pursue a coherent course of study of the Asian American experience. It provides a wide range of course selections about different Asian American ethnic groups and topics. It is of particular value for those students whose careers may bring them into regular professional contact with Asian American groups and communities.

General Education and SF State Studies
The Asian American Studies Department has designed its course offerings so that students may take a broad range of Asian American Studies courses while also meeting some General Education and other baccalaureate requirements. These offerings explore all aspects of Asian America, providing students with the opportunity to obtain a solid understanding of Asian American life and communities. In addition, by using AA S courses to partially complete General Education requirements, students can earn a major or minor in Asian American Studies in conjunction with another major, all within 120 units.

Liberal Studies
Asian American Studies courses can be used to meet many of the requirements for a B.A. in Liberal Studies (bulletin.sfsu.edu/colleges/liberal-creative-arts/liberal-studies/ba-liberal-studies), most especially as the basis for an emphasis in Ethnic Studies in Area III, Behavioral and Social Sciences. Students planning to seek a multiple subjects credential to teach in the elementary school grades can use additional Asian American Studies courses to meet some of the subject matter and general unit requirements. Students are encouraged to see a Liberal Studies advisor early in their enrollment.

Teacher Preparation
Courses in Asian American Studies provide important knowledge of Asians in America that can assist them in teaching in California. Coursework in Asian American Studies also will help prepare students to meet credential subject matter requirements as described above as part of the Liberal Studies major.

Graduate Program
The Master of Arts in Asian American Studies offers an interdisciplinary approach to theories and methods in Asian American Studies, as well as coursework in Asian American history, social sciences, and humanities. Students may write a research thesis, conduct a field report, or do a creative project as their culminating projects. Graduates of the program primarily enter academia or professional work with high contact with Asian American communities.

Career Outlook
Both baccalaureate and master’s degrees can be used to enhance work in Asian American communities, enhance career opportunities in the Pacific Rim areas, prepare for teaching and other professional careers, and prepare for doctoral studies or other professional degrees.
