The College of Health and Social Sciences was established in 1995 as the College of Health and Human Services. It is organized into the following administrative areas: Child and Adolescent Development; Family Interior Nutrition & Apparel (FINA); Counseling; Health Education; Kinesiology; Nursing; Physical Therapy and Clinical Laboratory Science; Recreation, Parks, and Tourism; Social Work; Sociology and Sexuality Studies; and the School of Public Affairs and Civic Engagement, which houses Criminal Justice Studies; Environmental Studies; Gerontology; Public Administration; and Urban Studies and Planning.

Mission of the College of Health and Social Sciences

The College of Health and Social Sciences prepares students to help solve the most pressing and enduring issues confronting the well-being of individuals, families, communities and society. Students, faculty, and staff participate in a learning process that fosters excellence in their professions and supports them in the pursuit of equity and social justice. To advance this mission, the College is committed to innovative teaching, scholarship, and service that inspires leadership for positive social change.

Vision of Scholarship

Consistent with the social justice mission of the University, the hallmark of the College of Health and Social Sciences is its belief in the potential of scholarship to right a wrong - an act of intellectual advocacy to serve the public good, to wrestle with critical social problems, and to transform how individuals, communities, and institutions function – by disseminating the knowledge from basic, translational, and applied research and by advancing the practice of specific disciplines. This vision is best achieved when scholarship is supported as a faculty-initiated and faculty-driven process that emerges from their intellectual curiosity, expertise, social engagement and professional identity. To affirm the breadth of faculty interests and to honor the spectrum of academic disciplines, the College embraces an inclusive view of scholarship as discovery, integration, application, teaching, and engagement. Among the qualities valued in scholarship, the College supports work that is ethical, innovative, interdisciplinary, collaborative, theoretical and applied.

Degrees Offered

Bachelor of Arts

- Child and Adolescent Development 08231
- Concentrations in:
  - Early Childhood
  - School Age Child and Family
  - Youth Work and Out of School Time
- Criminal Justice Studies 21051
