Bachelor of Science in Nursing (ADN-BSN)

The ADN-BSN Program is a collaborative model for academic progression in Nursing between SF State School of Nursing and designated California Community College (CCC) partners. This program is designed for students who meet University general education and community partner degree requirements to earn both ADN and BSN degrees in two and a half years through full-time study. Admission to this program is concurrent with the admission to the Associate Degree Nursing Program (ADN) at the College of San Mateo and City College of San Francisco (CCSF). The curriculum allows credit for some previous course work and with transcript evaluation and may provide up to 20 units for successfully passing the nursing licensure exam (NCLEX) for the State of California. After successful admission to both the ADN and ADN-BSN program, the students will be taking extra classes during the semester and summer. After completion of the ADN program, passing of the NCLEX exam and one last full-time semester in the ADN-BSN Program, the student will receive a BSN degree from San Francisco State University School of Nursing.

Current Community College Partner:
College of San Mateo (http://collegeofsanmateo.edu/nursing/degrees.asp)
City College of San Francisco

Admission/Application Information
- Spring entry only, application period: August. Please check the School of Nursing website for specific dates and application process.
- Both the School of Nursing supplemental application and the University application must be submitted for those applicants who are not already SF State students.
- The maximum number of transferable units is 70.

Admission Criteria
- Eligible for undergraduate or post-baccalaureate admission to the University.
- A nursing prerequisite GPA of 3.0 or higher at the time of the School of Nursing supplemental application.
- All nursing prerequisites completed with a minimum grade of C.
- Must be a California resident (https://www2.calstate.edu/apply/Pages/determining-california-residency.aspx) or be eligible for in-state tuition.
- Must be an incoming ADN student of College of San Mateo or City College of San Francisco
- Alumni of the College of San Mateo ADN Program or alumni of the City College of San Francisco may apply on a space available basis.

Prerequisite Courses – 35 Units
CSM students planning to obtain the ADN (Associate Degree in Nursing) and then complete the BSN (Bachelor of Science in Nursing) at San Francisco State should complete all requirements listed below.

<table>
<thead>
<tr>
<th>Prerequisite Courses to ADN at CSM</th>
<th>Alignment with SF State School of Nursing</th>

</table>

*When a student passes the NCLEX, the student is able to transfer a total of 90 units from CSM to SF State for the purpose of meeting the degree unit requirements. Normally, transfer students can only transfer a maximum of 70 units from the community college. This program allows for the additional 20 units that result from passing the NCLEX. NCLEX credit may be awarded on a student’s transcript only to give credit for the College of San Mateo (CSM) nursing course that 1) was successfully completed at CSM and 2) is required for the BSN program and 3) cannot be transferred from CSM because of the 70 unit transfer limit.

Other Important Notes:
1. The CSM Nursing Program requires MATH 120; however, to enroll concurrently at SF State, the student must complete MATH 200.
2. The coursework noted at CSM above includes nursing program prerequisites, CSM program courses, and CSU GE requirements.
Nursing GWAR Course Information
All undergraduate nursing students must have completed GE Area A2 prior to enrolling in NURS 312GW during semester one of the nursing major.

The ADN-BSN Course of Study—30 Units
The ADN-BSN program is for ADN students presently admitted and taking courses at College of San Mateo. This program will also be offered to CCSF students admitted into the ADN program in the near future. Applicants to the program must have satisfied a minimum of 60-semester units, including all lower-division GE requirements. This roadmap reflects only those courses offered by San Francisco State University. Students accepted into the program receive 20 units of upper division nursing credit for successfully passing the NCLEX–RN licensure exam.

Students completing the ADN-BSN program will achieve the School of Nursing’s BSN Expected Student Learning Outcomes as outlined below:

- Recognize the patient or designee as the source of control and full partner in providing compassionate and coordinated care based on respect for patient’s preferences, values, and needs.
- Function effectively within nursing and inter-professional teams, fostering open communication, mutual respect, and shared decision-making to achieve quality patient care.
- Integrate best current evidence with clinical expertise and patient/family preferences and values for delivery of optimal health care.
- Use data to monitor the outcomes of care processes and use improvement methods to design and test changes to continuously improve the quality and safety of healthcare systems.
- Minimizes risk of harm to patients and providers through both system effectiveness and individual performance.
- Use information and technology to communicate, manage knowledge, mitigate error, and support decision-making.
