Program Scope

The goal of the degree program is to prepare people for responsible positions in the public and nonprofit sectors. This includes positions in government but also in such entities as community development corporations, nonprofit social service agencies, planning and consulting organizations, and activities of private firms in public affairs and public policy areas. Applications are welcome from those with experience who wish to strengthen their capabilities or prepare themselves for new opportunities. Those without any work experience are advised to work in either the public or nonprofit sectors before applying for admission.

The Master of Public Administration is fully accredited by the Network of Schools of Public Policy, Affairs, and Administration (NASPAA).

The program is based on the premise that policy and administration must be understood in relation to each other. The core of the program seeks to develop foundational knowledge and analytical skills in public policy, public administration, and research. Beyond the core, the program develops student knowledge and understanding of management perspectives. In addition, the program offers seven areas of emphasis as an opportunity for specialization. They are nonprofit administration, public policy, public management, urban administration, criminal justice administration, gerontology, and environmental administration (offered in conjunction with the Department of Geography & Environment). The requirements for the MPA, in general, and the specialties, in particular, are shown in detail on the following pages. Students may also self-design an area of elective emphasis. Students may choose courses relevant to their professional interests offered by other departments and programs throughout the University.

Career Outlook

Graduates from the MPA program pursue their professional careers in various government agencies at federal, state, and local levels as well as in a variety of nonprofit organizations. Some work for consulting or research firms. A few pursue Ph.D.s at other universities to enter into a career in higher education.
