Program Scope
The Department of Urban Studies and Planning offers two programs: The Bachelor of Arts in Urban Studies and Planning and a Minor in Urban Studies and Planning. The B.A. is designed to prepare students for a wide range of urban planning and policy careers. The minor is designed to complement a wide range of SF State majors by offering students an opportunity to develop competence in urban planning and policy. The major and the minor are founded upon the conviction that urban universities have unique opportunities as well as responsibilities to help shape the future of city life.

Career Outlook
The USP program has been fortunate in attracting talented and motivated students whose central concern is to make our cities more livable, humane, and sustainable. These students have made important contributions as interns and researchers and as alumni; they have gone on to work as planners, analysts, and managers in private, non-profit, and public organizations throughout the region and beyond. Urban studies and planning alumni are employed in planning departments, housing and community development corporations, transportation planning agencies, health and social service organizations, private consulting firms, environmental organizations, real estate firms, general public management positions, and political organizations. The network of contacts maintained by the department with alumni provides solid evidence of the job opportunities available to Urban Studies and Planning graduates and their continuing contributions to the larger community and offers an invaluable resource to new graduates as they begin their job search.

A copy of the Department of Urban Studies and Planning Advising Handbook and further information about the major and minor can be found on the department's website at http://dusp.sfsu.edu/
