The Department of Broadcast and Electronic Communication Arts prepares students to create and critically evaluate content in the media arts. Our curriculum provides a balance of theory and practice while guiding students in the use of media to effectively communicate ideas that serve the evolving needs of society. Students go on to become innovative and ethical industry leaders who advance equity, social justice, and global citizenship.

Program Scope

The Department of Broadcast and Electronic Communication Arts (BECA) offers coursework leading to the Bachelor of Arts in Broadcast and Electronic Communication Arts, and the Master of Arts in Broadcast and Electronic Communication Arts. The curriculum is designed to provide extensive educational experience for those who intend to use the modern media of electronic communication to serve the artistic, cultural, educational, and informational needs of society. The program involves both theory and practice, and students are expected to work successfully in both types of courses and activities. Graduates of the program are prepared for work in the broadcasting and entertainment industries, in cable and on-line media, in video and audio production, and other areas related to electronic communication. Many graduates go on for graduate level study in the field of electronic media.

The B.A. program includes a core drawn from classes in the history and structure of electronic media, media aesthetics, media research, audio and video production, media ethics and regulation, communication theory and criticism, and writing and performance for the electronic media. In addition, students may elect to pursue one of the nine areas of emphasis within the department: audio production and music recording, broadcast journalism, business aspects of the electronic media, educational and instructional media, communication theory and criticism, interactive media, radio production and programming, television/video production, and writing for the electronic media, or they can design an individualized area of emphasis in consultation with a department advisor.

The M.A. program reflects a comprehensive view of the communication discipline with an integration of theory and practice. Emphasis areas include media aesthetics, audio and video production, news and documentary, interactive media, writing, management, and communication theory and criticism.

Two important co-curricular activities are open to students of the department. KSFS, the campus radio station, is distributed on-line and in San Francisco on stereo cable. KSFS Media produces newscasts, dramas, interviews, musical performances, and other productions for distribution to the San Francisco community through cable television and via the Internet. Collegiate chapters of the Audio Engineering Society and College Students in Broadcasting (an affiliate of American Women in Radio and Television) provide opportunities for service and fellowship in the department and the professional community. The San Francisco Bay Area provides a wealth of media organizations that cooperate with the BECA department in a large, active internship program.
