Program Scope
The Department of Philosophy offers students a broad education in the history of thought, development of powerful reasoning skills, and opportunities to apply their insights and skills to areas of personal and professional interest.

An education in philosophy is beneficial in almost all parts of life. Generally speaking, philosophical education is eminently valuable for careers that call for analysis and evaluation of problems, smart solutions, critical and creative thinking and writing, and powerful advocacy of one's beliefs and values. Our degree programs develop students’ potential for independent thought and intellectual creativity. Philosophy students score extremely well on the admission tests required by various post-baccalaureate professional schools. A double major in philosophy complements and enhances other degrees, whether in the sciences, social sciences, arts, humanities, or professional studies.

Students can choose a degree program that includes both general theories in the different philosophical fields and philosophy as applied in different areas of understanding (the B.A. in Philosophy), or a degree that intersects philosophy and religion with a focus on the diverse forms of spirituality (the B.A. in Philosophy and Religion), or a program that emphasizes foundations of law, public policy and rights (the B.A. in Philosophy with an Emphasis in Philosophy and Law). The department’s programs also recognize students’ diversity of interests by allowing a great deal of flexibility in choosing program content.

Students may double-major, combining the skills, perspectives, and knowledge acquired in the philosophy major with a pre-professional, social science, liberal arts, healthcare, human services, liberal studies, education, business, biological, pre-medicine, physical or computer science degree. A double major in philosophy complements and enhances other degrees, whether in the sciences, social sciences, arts, humanities, or professional studies.

Graduate Program
The Master of Arts in Philosophy is designed for students wishing to extend their knowledge of, and competence in, philosophy; for students seeking a teaching career where the master’s degree is required; and for students who are planning to do further study elsewhere. The program is wide-ranging and flexible, enabling students to concentrate on a number of different areas within philosophy.

Career Outlook
A principal reason for the study of philosophy and/or religion is the enrichment of one's own life and understanding. Fortunately, the study of philosophy also is excellent preparation for a variety of post-baccalaureate professional studies and careers in law, medicine, public policy and strategic planning, the helping professions, computer-assisted enterprises, and innovative business and non-profit organizations.

The broader outlook and the ability to think critically about larger issues that are fostered by the systematic study of philosophy and religion are often highly valued by commercial firms in their management level personnel. Some students continue on to graduate work in philosophy or religious studies. SF State graduates now are teaching in colleges across the country. And opportunities to teach philosophy in K-12 have increased as educators realize the importance of enhancing children’s critical thinking skills. The philosophy and religion program is a strong foundation for the helping professions, the ministry, and advanced studies in theology. The skills that are achieved by minorin in philosophy or philosophy and religion are an excellent complement to most university major programs.
