**BACHELOR OF SCIENCE IN BIOLOGY: CONCENTRATION IN MARINE BIOLOGY AND LIMNOLOGY**

**Impaction**

All Biology concentrations are impacted, which means that students must first enroll as pre-biology majors. Upon successful completion (C- or better) of two courses in the major, students may apply to become a Biology major. Both new transfer and on-campus students wishing to change majors are required to submit an additional departmental application. See the departmental website biology.sfsu.edu for supplemental program application and deadlines.

**General Information and Requirements**

- Candidates entering the bachelor's programs in biology should have completed three years of high school mathematics and one year of high school chemistry to allow completion of the curriculum in a timely fashion (see Undergraduate Admission Requirements).
- All major coursework must be completed with letter grades (CR/NC is not acceptable).
- A minimum grade point average of 2.0 in all coursework is required to receive a degree in these programs.
- To remain enrolled in a biology course, students must be prepared to provide copies of transcripts demonstrating completion of prerequisite courses with a grade of C– or better.
- At least 12 units in biology must be completed at SF State.
- Early in the first semester, and at regular intervals thereafter, students must consult with a biology advisor to plan a program of study. For the most current advising information, go to biology.sfsu.edu.

**Program Learning Outcomes**

**Core Competencies**

1. UNDERSTANDING THE PROCESS OF SCIENCE: Students will demonstrate how a theory is supported or can be rejected based on data from experiments.
2. QUANTITATIVE REASONING: Students will be able to create graphs and perform simple statistical tests to determine whether or not differences between groups are significant.
3. RELATIONSHIP BETWEEN SCIENCE AND SOCIETY: Students will be able to explain a biological process or phenomenon as it relates to a societal issue.

**Core Concepts**

1. EVOLUTION: Students will be able to understand the fundamental concepts of evolution, role of selective pressures, how genes change
2. RELATIONSHIP BETWEEN STRUCTURE AND FUNCTION: Students will be able to describe how variation in the structure of an organ in a plant or animal contributes to variation in its function
3. INFORMATION FLOW AND STORAGE: Students will be able to explain the transmission of heritable traits

**Graduation Writing Assessment Requirement (GWAR)**

Students must earn a C or better in a GWAR course to satisfy the requirement.

Biology majors have flexibility for which GWAR course they can take to meet their requirement, as long as the prerequisites for the course have been completed.

In general,

- Cell & Molecular Biology majors should take BIOL 351GW;
- Microbiology majors should take BIOL 402GW;
- Botany, Ecology, and Zoology majors may choose between BIOL 475GW, BIOL 478GW or BIOL 529GW;
- Marine Biology majors may choose between BIOL 570GW or BIOL 631GW; and
- Physiology majors may choose between BIOL 613GW or BIOL 631GW.
- General Biology majors may take any BIOL GWAR class.

See also the Department of Biology home page for GWAR in Biology. biology.sfsu.edu/content/gwar or contact a departmental advisor for further information.

The department does not permit multiple concentrations within the biology degree program. All of the curricula require preliminary work in physics and chemistry because many important biological concepts are based squarely upon principles in the physical sciences. Also, each curriculum includes upper division work in the biological sciences so that students will receive reasonable breadth and depth in their degree program. Because of the sequential arrangement of courses students are urged to consult the descriptions for the prerequisites of all their courses.

Although course electives are listed for most of the majors, new electives are always being added to various programs. Therefore, we highly recommend that students seek advisement prior to enrolling in elective courses in their major.

**Concentration in Marine Biology and Limnology**

Undergraduates may elect a general emphasis in marine invertebrate zoology, marine vertebrate zoology, marine botany, marine microbiology, or limnology. Graduate work may also be general or follow specific strengths such as ecology, evolution and systematics, functional morphology, physiology, behavior, estuarine or freshwater biology.

**Biology (B.S.): Concentration in Marine Biology and Limnology — 66–68 units**

**Lower Division Requirements (34–35 units)**

Select 16-17 units from the following: 16-17
General Chemistry II: Quantitative Applications of Chemistry Concepts
and General Chemistry II Laboratory: Quantitative Applications of Chemistry Concepts

Calculus I

Calculus II

General Physics I
and General Physics I Laboratory

General Physics II
and General Physics II Laboratory

Evolution
Genetics
Biometry
Plant Physiology (select on advisement)

or
Animal Physiology

Select 3-5 units on advisement from the following:

Wetland Ecology
Limnology
Biological Oceanography
Marine Ecology

Biology of the Algae
Plant Molecular Physiology Laboratory
Restoration Ecology
Marine Invertebrate Zoology
Natural History of Marine Invertebrates

Biology of Fishes - GWAR
Fisheries Biology
Marine Microbial Ecology Laboratory
Marine Ecology
Marine Ecology Laboratory
Animal Physiology Laboratory - GWAR
Chemical Oceanography
Watershed Assessment and Restoration
Coastal Processes

Any Marine Science Course between MSCI 312 and MSCI 344 without duplicating courses taken at SF State

Note: A minimum of 40 upper division units must be completed for the degree (including upper division units required for the major, general education, electives, etc.). A student can complete this major yet not attain the necessary number of upper division units required for graduation. In this case, additional upper division courses will be needed to reach the required total.

SF State Studies

Courses certified as meeting the SF State Studies requirements may be upper or lower division in General Education (GE), a major or minor, or an elective.

American Ethnic and Racial Minorities
Environmental Sustainability
Global Perspectives
Social Justice

Note: LD = Lower-Division; UD = Upper-Division.

First-Time Student Roadmap (4 Year)

Find the correct roadmap (A, B, C, or D):

1. Select the row that matches your English Course choice for A2.*
2. Select the column that matches your QR Category (found at your student center under Math Alert).
3. Click the Roadmap that lines up with your row and column.
For example, if you are taking ENG 104 as your first English course and your student center math alert says you are QR Category III, you should choose Roadmap D.

<table>
<thead>
<tr>
<th>Pathway</th>
<th>QR Cat I/II</th>
<th>QR Cat III/IV</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENG 114</td>
<td>Roadmap A</td>
<td>Roadmap C</td>
</tr>
<tr>
<td>ENG 104/ENG 105</td>
<td>Roadmap B</td>
<td>Roadmap D</td>
</tr>
</tbody>
</table>

*Composition for Multilingual Students: If taking ENG 209 as your first English course, choose the ENG 114 row. If taking ENG 204 for your first English course, choose the ENG 104/ENG 105 row.

**General Advising Information for Transfer Students**

1. Before transfer, complete as many lower-division requirements or electives for this major as possible.
2. The following courses are not required for admission but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit [http://www.assist.org](http://www.assist.org). Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower-division major requirements for this major;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper-division transfer (for example, if a course was not passed on the first attempt or was taken to earn a better grade).

Before leaving the last California Community College of attendance, obtain a summary of completion of lower-division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering, and mathematics (STEM) disciplines often defer 6-9 units of lower-division general education in Areas C and D until after transfer to focus on preparation courses for the major. This advice does not apply to students pursuing associate degree completion before transfer.

**Transferring From Institutions Other Than CCCs or CSUs**

Review SF State’s lower-division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State’s lower-division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no
later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

All Students Must Meet the Transfer Eligibility Requirements Outlined Below for Admission.

For more information, visit the Undergraduate Admissions section.

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.0 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30-semester units (45-quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE Area A1)
  b. One course in written composition (same as CSU GE Area A2)
  c. One course in critical thinking (same as CSU GE Area A3)
  d. One course in mathematics or quantitative reasoning (same as CSU GE Area B4)
- The four basic skills courses and a minimum of 60 transferable semester units (90-quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a “C-” or better grade in each basic skills course.
