MASTER OF SCIENCE IN ENGINEERING: CONCENTRATION IN EMBEDDED ELECTRICAL AND COMPUTER SYSTEMS

Admission to the Program
Applicants must hold a bachelor's degree in engineering, or a closely related discipline, with a minimum GPA of 3.0 in upper division major classes in addition to meeting general university requirements for graduate standing. The School of Engineering also requires two letters of recommendation from persons familiar with the student's previous academic work or professional accomplishments. Graduate Record Exam (GRE) scores within the last three years are also required. A minimum score of 550 on the paper exam or 213 on the computer-based TOEFL is required for graduate applicants whose preparatory education was principally in a language other than English.

Advancement to Candidacy
The applicant is advanced to candidacy when the Advancement to Candidacy (ATC) has been signed and approved by the Dean of the Graduate Division.

Written English Proficiency Requirements
Level One
As a preadmission requirement, applicants must have satisfied one of the following:

1. a score of at least 4.0/6.0 on the GRE or GMAT Analytic Writing Assessment;
2. a score of at least 4.5/6.0 on the essay test of the paper-based [PBT] TOEFL (a minimum score of 24/30 on the Writing section of the Internet-based test [IBT] TOEFL);
3. a score of at least 6.5/9.0 on the IELTS writing test, or a concordant score on the Pearson Test of English.

An applicant that does not meet the above requirement may be conditionally accepted to the program but must complete SCI 614 within the first year of attendance at SF State in order to meet the Level One requirement. SCI 614 does not count toward the 30 unit MS course work requirement.

Level Two
is satisfied by the completion of a written thesis (ENGR 898) or research project (ENGR 895).

Curriculum
The Master of Science in Engineering is based on 30 semester units of which at least 21 units must be earned from graduate level courses. We expect that the graduate coordinator will work closely with individual students to develop a curriculum plan that ensures academic rigor while at the same time meeting the needs of the student. The curriculum includes 12 units of required engineering courses and a minimum of 6 units of elective engineering courses. A maximum of 6 units of elective non-engineering courses may be applied to the degree requirements with the consent of the graduate coordinator if they are consistent with the student's overall career objectives as provided in the program of study.

There are two options for the culminating experience. One option is to first take a 3-unit research course (ENGR 897), and then a 3-unit thesis course (ENGR 898). The other option is to take a 3-unit applied research project course (ENGR 895).

Engineering (M.S.): Concentration in Embedded Electrical and Computer Systems – Minimum 30 units

Required Courses (12 units)

- ENGR 800  Engineering Communications 3
- ENGR 801  Engineering Management 3
- ENGR 844  Embedded Systems 3
- ENGR 852  Advanced Digital Design 3

The aggregate of courses that comprise the core of this concentration is designed to give students a broad foundation in general areas of engineering project management and engineering communications, and in embedded systems. These courses are aimed to provide our students opportunities for career advancement in their profession.

Elective Engineering Courses (6 - 15 units)

Elective technical engineering courses are selected from the following list upon approval of the graduate coordinator.

- ENGR 447  Control Systems 4
- ENGR 446 & ENGR 447  Control Systems Laboratory 4
- ENGR 449  Communication Systems 3
- ENGR 451  Digital Signal Processing 4
- ENGR 456  Computer Systems 3
- ENGR 476  Computer Communications Networks 3
- ENGR 478  Design with Microprocessors 4
- ENGR 848  Digital VLSI Design 3
- ENGR 849  Advanced Analog IC Design 3
- ENGR 850  Digital Design Verification 3
- ENGR 851  Advanced Microprocessor Architectures 3
- ENGR 853  Advanced Topics in Computer Communication and Networks 3
- ENGR 854  Wireless Data Communication Standards 3
- ENGR 856  Nanoscale Circuits and Systems 3
- ENGR 868  Advanced Control Systems 3
- ENGR 869  Robotics 3

A program cannot contain more than 9 units of courses with a course number below 700. Some upper division engineering courses may also be used as electives if not used in the undergraduate degree program and approved by the graduate coordinator.

Non-Engineering Electives (0 - 6 units)

Courses, either graduate or upper-division, selected primarily from science, mathematics, social science, or business, upon approval of the graduate coordinator.

Culminating Experience (3 - 6 units)

Units selected from one of the options below
Master of Science in Engineering: Concentration in Embedded Electrical and Computer Systems
