EOP Summer Bridge

The Summer Bridge Program is an eight-week non-residential academic program that facilitates the transition from high school to the university. Participants are provided with an opportunity to adjust to the university environment and are introduced to an extensive educational support service network. The program allows participants to formulate a strong sense of belonging and connectedness to EOP and the university.

Summer Bridge participants will have the opportunity to complete the Early Start Program requirements during the eight-week Summer Bridge Program.

After completing the Summer Bridge Program, participants will have developed practical study skills to enhance academic success and a working knowledge of the resources, services, and structure of the university community.
