

STUDENT OUTREACH SERVICES

Student Outreach Services (SOS) serves as the University liaison with other educational institutions and agencies, teachers, counselors, parents, and prospective students. Our department disseminates information about admissions, majors, programs, and related policies and procedures. SOS conducts pre-admissions information sessions, transcript reviews, and evaluations for prospective students. SOS also conducts high school and community college presentations and meets one-on-one with prospective high school and transfer students at San Francisco State University and at their schools. We coordinate and provide campus visits and tours for individuals, groups, and families. SOS also participates in educational equity projects and coordinates the operation of the overall University outreach program.
