Program Scope
The Department of Urban Studies and Planning offers two programs: The Bachelor of Arts in Urban Studies and Planning and a Minor in Urban Studies and Planning. The B.A. is designed to prepare students for a wide range of urban planning and policy careers. The minor is designed to complement a wide range of SF State majors by offering students an opportunity to develop competence in urban planning and policy. The major and the minor are founded upon the conviction that urban universities have unique opportunities and responsibilities to help shape the future of city life.

Career Outlook
The B.A. in Urban Studies and Planning prepares students for a broad range of careers in urban planning, administration, and community development. It is also recognized as a solid basis for graduate study. As a program, our central concern is to prepare our students to make meaningful contributions to making our cities more livable, humane, and sustainable. The major, through internships, fellowships, applied research, and community engagement opportunities, offers students the opportunity to apply theoretical concepts to real-world issues while building their professional networks. Urban Studies and Planning Alumni have gone on to work as planners, housing and community development corporations, transportation planning agencies, health and social service organizations, private consulting firms, environmental organizations, real estate firms, general public management positions, and political organizations. The network of contacts maintained by the department with alumni also offers an invaluable resource to new graduates as they begin their job search.

Further information about the major and minor can be found on the department’s website at https://pace.sfsu.edu/usp
