BACHELOR OF ARTS IN CHEMISTRY

High school preparation for the Chemistry and Biochemistry degree programs should include two years of algebra, one year of geometry, one semester of trigonometry, one year of chemistry, and one year of physics. Calculus is highly recommended.

Program Learning Outcomes

a. Demonstrate an understanding of key concepts and an ability to solve problems in the five chemistry sub-disciplines: analytical chemistry, biochemistry, inorganic chemistry, organic chemistry, and physical chemistry.
b. Perform basic chemistry laboratory procedures, including the use of modern instrumentation, for the synthesis, separation, isolation, analysis, and characterization of molecules.
c. Effectively communicate the results of scientific experiments in oral reports, technical graphics, and written reports.
d. Demonstrate the retention and synthesis of prior learning in advanced classes.
e. Search the chemical literature for published work relevant to a project of interest, read and understand technical literature related to the discipline.
f. Draw on classroom knowledge to contribute to solutions to problems encountered in a laboratory.
g. Articulate an understanding of the relationship between chemistry and related disciplines such as biological science, materials science, and environmental science.
h. Contribute to solving problems encountered in chemistry as part of a team.
i. Understand the key experiments that led to the development of chemical theories and models.

Chemistry (B.A.) — 56 units minimum

• All courses used in the major program must be completed with letter grades (CR/NC not allowed) and a minimum GPA of 2.0 (SF State Major GPA).
• Grades of C or better are required in Chemistry prerequisite courses.
• Other courses for the major must be completed with grades of C— or better with one exception.

Upper-Division Electives (3 units minimum)

Students must complete at least 3 units of upper-division electives selected from the list below. Courses from community colleges cannot be substituted for the courses on the list below. Consult with an advisor regarding selection of elective courses and check course co- and prerequisites before enrolling. Graduate-level courses in chemistry or appropriate courses in biology, physics, geosciences, and computer science may be substituted upon prior approval of an advisor. Students should keep in mind that non-Chemistry courses may require additional
prerequisites that are not met in the Chemistry degree or permission of the instructor.

Note: A minimum of 30 upper-division units must be completed for the degree (including upper-division units required for the major, General Education, electives, etc.). A student can complete this major yet not attain the necessary number of upper-division units required for graduation. In this case, additional upper-division courses will be needed to reach the required total.

¹ For students who pursue a double major in the BA Chemistry and BS Biochemistry programs, CHEM 343 cannot be used to meet the elective requirement for the BA Chemistry. Students must take a different approved elective list to meet this requirement.

² May be counted only once as an elective.

³ By petition only. To be used as an upper division elective in Chemistry, a minimum of 3-units must be taken in a single semester.

Complementary Studies

Students in the B.A. Chemistry program will satisfy the Complementary Studies requirement with the completion of courses in Physics and Mathematics that are required for the major.

Students who have earned AA-T or AS-T degrees and are pursuing a similar B.A. degree at SF State are required to fulfill the Complementary Studies requirement as defined by the major department. Students should consult with a major advisor about how transfer units and/or SF State units can best be applied to this requirement in order to ensure degree completion within 60 units.

First-Time Student Roadmap (4 Year)

a. The roadmaps presented in this Bulletin are intended as suggested plans of study and do not replace meeting with an advisor. For a more personalized roadmap, please use the Degree Planner (https://registrar.sfsu.edu/degreeplaner/) tool found in your Student Center.

b. In order to choose your English Composition A2 course and your Q/R/Math B4 course, please complete the online advising activities at writingadvising.sfsu.edu (https://writingadvising.sfsu.edu) and mathadvising.sfsu.edu. Questions? Contact Gator Smart Start (https://gatorsmartstart.sfsu.edu).

First-Time Student Roadmap (http://bulletin.sfsu.edu/colleges/science-engineering/chemistry-biochemistry/chemistry-biochemistry-roadmap-i-ii-eng/)

Transfer Student Roadmap (2 Year)

For students with an AS-T in Chemistry.
This degree program is an approved pathway ("similar" major) for students earning the ADT in Chemistry

California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T).

An ADT totals 60 units and in most cases includes completion of all lower-division General Education requirements and at least 18 units in a specific major. (The Biology, Chemistry, and Environmental Science AS-T degrees defer 3 units in lower-division GE area C and 3 units in lower-division GE area D until after transfer.) Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a "similar" major after transfer. Determinations about "similar" majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a "similar" major at SF State is available on the Roadmaps tab on the degree requirements page for the major. The roadmap displays:

- How many lower-division units required for the major have been completed upon entry based on the award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on the award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

General Advising Information for Transfer Students

a. Before transfer, complete as many lower-division requirements or electives for this major as possible.

b. The following courses are not required for admission but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer:
   - a course in U.S. History
   - a course in U.S. & California Government
   - a course in U.S. & California Government
   - a course in U.S. History
   - a course in U.S. & California Government
   - a course in U.S. History

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible

Transferring From Institutions Other Than CCCs or CSUs

Review SF State’s lower-division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State’s lower-division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.
