MASTER OF SCIENCE IN GEOGRAPHIC INFORMATION SCIENCE

Graduate Advisors: Leonhard Blesius, Jerry Davis, Ellen Hines, XiaoHang Liu

Admission to the Program

For admission to the graduate program, a student must meet the general University requirements as stated in the Bulletin. An applicant must have a baccalaureate degree from an accredited institution with a GPA of 3.25 or better in geography or a related discipline, with emphasis or experience in spatial data analysis, and have earned a grade of B or better in GEOG 603, or equivalent.

Please submit applications through Cal State Apply (https://www2.calstate.edu/apply/). Transcripts, a Statement of Purpose, and two letters of recommendation are required. Personal interviews with graduate advisors and the appropriate department faculty are recommended.

Program Learning Outcomes

1. Demonstrate skills appropriate to master’s-level work in Geography.
2. Understand the use of appropriate methods of inquiry in GIScience research.
3. Quantitatively analyze a geographic research question.
4. Develop and formulate research questions from literature or internship experience.
5. Use skills and knowledge to answer research questions through a thesis or research project.

Written English Proficiency Requirements

The University has a requirement for written English proficiency that is to be assessed at two different levels.

Level One

Written English proficiency will be assessed on the basis of the Statement of Purpose. Students who demonstrate a need for additional writing support will be required to take a graduate-level writing class.

Level Two

Satisfactory completion of GEOG 895 or GEOG 898.

Advancement to Candidacy

In addition to fulfilling all University requirements, students must complete the required curriculum outlined below. All graduate seminars and all courses used on the Advancement to Candidacy (ATC) with the exception of Geography 895 and 898 must be taken on a letter grade basis and have earned a B– or better. Not more than three units of Special Study (GEOG 899) and 1 unit of Special Study (GEOG 699) may be included on the ATC. Each student must consult with their graduate advisor regularly and design an individual program leading towards the culminating experience requirement (thesis or research paper). For advancement to candidacy, the student must select a culminating experience committee comprised of two or three members, at least two of whom must be full-time faculty in geography at SF State, and must present a research proposal to the department.

Upper-division courses offered by the department may be included with the approval of the graduate advisor. Depending on a student’s background and/or objective, additional courses in geography or a related field may be required on advisement. Note: A maximum of 30% undergraduate-only courses may be used in a graduate program.

Geographic Information Science (M.S.) – Minimum 30 units

Prerequisites as Needed (0-3 units)

Approved courses from among the following on advisement:

- CSC 667  Internet Application Design and Development
- CSC 675  Introduction to Database Systems
- GEOG 606  Cartography
- GEOG 625  Programming for Geographic Information Science
- GEOG 629  Coastal and Marine Applications of GIS
- GEOG 642  Watershed Assessment and Restoration
- GEOG 657  Natural Resource Management: Biotic Resources
- GEOG 702  Field Methods in Environmental Science & Physical Geography
- GEOG 704  Environmental Data Science                | 3     |
- GEOG 810  Seminar in Physical Geography              | 3     |
- GEOG 820  Human and Social Geography                 | 3     |
- GEOG 857  Issues in Marine and Estuarine Conservation | 3     |
- or ERTH 702  Quantitative Methods in Geosciences     |       |
Culminating Experience (3 units)

Comprehensive Oral Examination (GEOG 895)
A two-hour oral examination is required of all students using this option. One hour is devoted to the research topic (GEOG 895) and a second hour of comprehensive oral examination on the theory and applications of GIScience. The examination or either of its parts may be repeated only once. Students must have completed all coursework prior to taking the oral examination, which can be scheduled only during the fall and spring semesters. Examination guidelines are available from the graduate advisor.

Research Proposal
The department requires all graduate students to present a proposal of their research for culminating experience to faculty and peers within a semester of filing the Proposal for Culminating Experience. The object is to provide students with useful feedback in the critical developmental stage of the research experience. Students present a twenty-minute synopsis of their research ideas to faculty and fellow graduate students focusing particularly on linking the research to a broader theoretical framework and presenting a methodology design to achieve the stated objectives. This is followed by twenty minutes (maximum) for questions and comments. Proposal presentations are scheduled as needed.
