

MASTER OF ARTS IN PSYCHOLOGICAL SCIENCE: CONCENTRATION IN MIND, BRAIN & BEHAVIOR

Program Coordinators: Mark Geisler, Avi Ben-Zeev

The Master of Arts in Psychological Science: Concentration in Mind, Brain, and Behavior consists of 35 semester units (includes thesis and six elective units) typically requiring four semesters to complete. Much of the Program is tutorial, with each student working closely with a faculty adviser. Twelve of the units involve independent study with an appropriate faculty member. Students are permitted, on their initiative and with their adviser's approval, to affiliate with laboratories, clinics, or other institutions in the greater San Francisco Bay Area for the purpose of conducting some of the research required by the Program. Under consortium arrangement, some courses may be taken at the University of California, San Francisco (UCSF), upon approval of the student's advisor and the UCSF instructor.

Graduate Programs in Psychology

Application to a graduate program is completed through the Cal State Apply (<https://www2.calstate.edu/apply/>) application process.

The graduate admission application must be submitted by the deadline to be considered for admission. The department accepts applications for the fall semester only, with a deadline of February 1st. The Master in Science programs generally require an interview during the admissions process.

Some of the Psychology graduate programs require applicants to submit the results of the Graduate Record Examination — verbal, quantitative, and writing sections. Applicants should check the current application of the program they are applying for requirements.

Students who intend to work toward the M.A. or the M.S. in Psychology must meet the prerequisites outlined within each concentration. Required undergraduate coursework that an applicant may not have completed can be rectified as the graduate advisor deems fit without being included as units toward completion of the master's degree

To advance to candidacy (graduation), graduate students must meet all the general requirements for the specific program in which they are involved.

Written English Proficiency Requirement

Graduate students pursuing a Master of Arts in Psychological Science: Concentration in Mind, Brain, and Behavior must meet both of the following proficiencies to advance to candidacy (graduation):

- Level One - A score of 4.0 or better on the GRE Analytical Writing Test or equivalent.
- Level Two - Satisfactory completion of the master's thesis (PSY 898).

Prerequisites

Applicants to the Master of Arts in Psychological Science: Concentration in Mind, Brain, and Behavior need a course in statistical methods and a course either in experimental psychology or psychological research methods; or a course combining statistics and research methods.

Program Learning Outcomes

Upon completion of the Master of Arts in Psychological Science: Concentration in Mind, Brain, and Behavior the student will be able to:

1. Develop theory-based knowledge that students can then translate into empirical designs.
2. Hone and expand expertise in statistics, including in using Jamovi and R.
3. 3 Understand and follow ethical guideline in conducting research.

Psychological Science (M.A.): Concentration in Mind, Brain, and Behavior – Minimum 37 units

Code	Title	Units
PSY 771	Analysis of Variance and Experimental Design	4
PSY 772	Applications of Multiple Regression to Psychological Research	4
PSY 770	Research Methods and Techniques	3
PSY 792	Proseminar in Foundations of Contemporary Psychological Research	3
PSY 798	Research Colloquium	3
PSY 799	Supervised Selected Research	5
PSY 891	Seminar in Selected Problems (or Elective course approved by graduate advisor)	3
PSY 896	Directed Reading	3
PSY 898	Master's Thesis	3

Upper Division/Graduate Units (6 units)

in psychology or allied fields approved by a graduate major advisor.
